

Crypto-Magique Inc. - National Super Computer Program

CMI_NSCP

This program is focused on:

A more Made in Canada hardware element, servers, workstations, laptop & custom
the national processor development program,
replace the design flaw of the x86 processor,
the national chip program for integrated chips, graphical processing units - GPU,
super computing applications, basic and advanced research and development
software for engineering, special projects, operating systems, the Open Laptop initiative
free & open source software...interesting and useful projects worldwide!

Mission Tasking includes enterprise development, capital and fund raising campaigns,
awareness, contribution, involvement, development, promotion and use or acquisition
of enterprise, products, services, technology, philosophy and much more than just
freedom...

This works with all the other Crypto-Magique Inc. Programs and other awesome stuff...

Although the original mission was mainly directed to Canada, the reality is that this is an
urgent need for the entire planet, at least for those who like freedom, privacy,
happiness, quality of life, peace, free enterprise, successful national industry,
economics and enterprise with a few components essential to the survival and
prosperity in the modern age...

This is by no means complete, as there are many very smart people with great ideas,
technology, products, services, capabilities and vision, true values and character...

Our intention here is to help others help themselves, promote some of these ideas and more
for the benefit of a more advanced, prosperous and secure civilization...where
personal, financial, enterprise privacy is essential.
